

RECLAIMED WOOD

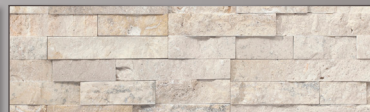

RECLAIMED WOOD-NATURAL

RECLAIMED WOOD + STONE

When designing our Reclaimed Wood Panels, we wanted to craft them out of a material that is both beautiful and sustainable, and our search led us to Teak. Revered for its strength and durability by shipbuilders, and chosen for its natural beauty by furniture makers, this highly-coveted wood strikes the perfect balance between form and function. Hand-selected hardwood pieces are meticulously crafted into panels that blend together seamlessly, just like our natural stone veneer panels. Pair the two for a unique texture rich installation that is easy to install and as one of a kind as your home.
